

Genoa, 05th November 2015

James Ellis has provided Architectural Consultations to Ansaldo Energia, for Avon and Dedisa Power Plants, since July 2011.

The following has been included in James Ellis' scope:

- *Checking suitability of building designs completed in Europe, for South African conditions.*
- *Advising on modifications and/ or developments to the building designs, materials and construction methods.*
- *Ensuring compliance with local Building Regulations.*
- *Completing SDP and Building Plan Submission to the local authorities for approval.*
- *Completing Construction Documentation.*
- *Advising on finishes and fittings for the buildings.*
- *Carrying out inspections of the building construction and reporting on non-compliance, with suggestions for rectification when applicable.*
- *Correspondence with Coega Development Corporation and Municipalities in order to achieve Occupancy Certificates for the Power Plants.*

James has displayed the following attributes in his service provided to Ansaldo Energia over the years:

- *Hard worker, fully committed to Ansaldo Energia results.*
- *High professionalism in all the contexts.*
- *Clear and direct in communication.*
- *Transparent and honest.*
- *Scrupulous and accurate in his job.*
- *Committed to adding value.*

Best regards
